WE FOCUS ON
SUSTAINABILITY

„Anything that is against nature
will not last in the long run."
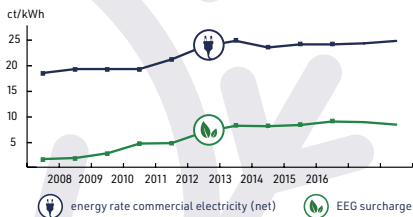

Charles Darwin

WE TAKE
RESPONSIBILITY

As the operator of several data centers, we have a particular responsibility towards our environment, which is why we see it as our duty to consciously ensure that we maintain a positive environmental footprint when providing our services:

- ☑ data protection and security
- ☑ optimised data center infrastructure
- ☑ IT security management

energy rate commercial electricity (net)   EEG surcharge

Despite the steady rise in electricity prices in recent years, we remain true to our values, a sustainable energy supply and the state of Thuringia as a location for our data centers.

ENVIRONMENTALLY FRIENDLY HOSTING

Through various measures, we are able to operate our data centers in a particularly energy-efficient and resource-saving manner and keep CO_2 emissions as low as possible.

- ☑ Our data centers are powered 100 % by green electricity from hydropower, which is considered the most natural renewable energy source from an ecological point of view.
- ☑ We use the most efficient hardware components and cooling technology. At low outside temperatures, cooling is provided by outside air.
- ☑ Thanks to the principle of cold and hot aisles in combination with cold aisle containment, less energy is constantly being used.

If you would like to find out more about Keyweb hosting solutions, you will find comprehensive information on our website: **keyweb.de.**

ENVIRONMENTALLY FRIENDLY HOSTING

At Keyweb, sustainability is reflected not only in the operation of the data centers, but also in the organisation of various work processes:

- ☑ use of certified and recyclable products and materials
- ☑ intelligent and efficient use of resources in everyday office life
- ☑ reduction of pollutants and avoidance of pollutant-generating transport routes

CORPORATE RESPONSIBILITY AT KEYWEB

We promote the health and well-being of our employees and a friendly working atmosphere with a wide range of measures.

Social commitment

As part of society and public life, we are involved in a wide range of projects for children and people with health impairments, as well as for artistic and cultural projects in Thuringia. These include, for example:

- ☑ cooperation with a workshop for the disabled
- ☑ support for hearing-impaired children and young people
- ☑ promoting sustainable mobility
- ☑ measures and promotion of educational programmes in schools

Place your trust in certified sustainability in the areas of ecology, economy and social competence. We will be happy to send you the test report from the German Institute for Sustainability and Economics ("Deutsches Institut für Nachhaltigkeit und Ökonomie").
